

Improving Debugging For Optimized Rust Code

Master Thesis

Niklas Lundberg

Department of Computer Science, Electrical and Space Engineering
Luleå University of Technology

September 2, 2021

Overview

1. Introduction
2. DWARF
3. Implementation
4. Evaluation and Discussion
5. Conclusion

What is debugging

- The process of finding and resolving errors, flaws, or faults.
- Debugging techniques:
 - Back tracking
 - Testing
 - Control flow analysis
 - And more
- Debugging is very useful for embedded systems.

What is a Debugger

- A Debugger is a debugging tool.
- Control over the debugged computer program.
- Some of the most common control features:
 - Continue/Start/Run
 - Stop/Halt
 - Restart
 - Step
 - Set and remove breakpoint.

What is a Debugger

- Visualisation of the debugged target state.
- Some of the most common visualisation features:
 - Evaluate variables
 - Stacktrace, unwinding call stack
 - Show machine and Assembly code
 - Show relevant source code.

Unoptimized Vs Optimized code

- Unoptimized:
 - All variables stored in memory.
 - Very simmlilar to source code.
 - Slow to exectue.
 - Easy to debug.
- Optimized:
 - Faster to execute.
 - Some Variables temporarily stored in registery.
 - Some functions are inlined.
 - Difficult to debug.

Problem definition

- Improve Debugging for optimized Rust code.

Motivation

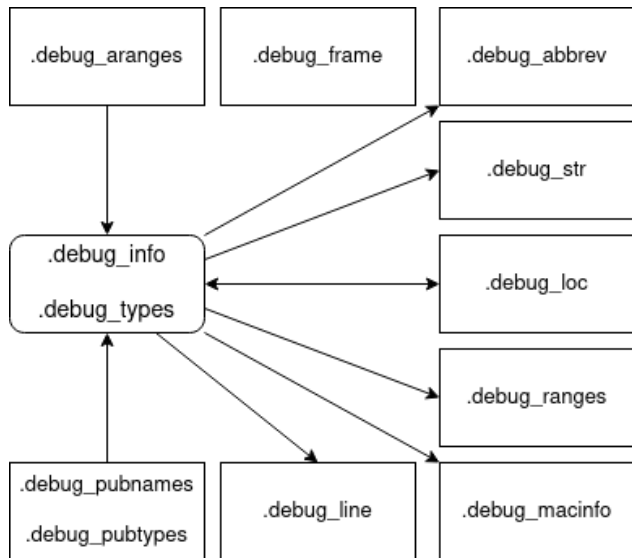

- Unoptimized Rust code is too slow.
- Debugging embedded systems.
- GDB and LLDB do not work very well.
- Write a debugger in Rust.

Deliminations

- Not working on rustc, LLVM and DWARF.
- The debugger will not support all MCUs.
- Features the debugger will have:
 - Continue, Stop, Reset and step.
 - Set and remove breakpoints.
 - Evaluate variables
 - Stacktrace
 - CLI
 - Support Debug Adapter Protocol(DAP)

- Debugging with Attributed Record Formats(DWARF)
- Debug information format
- Executable and Linkable Format(ELF)

DWARF Sections

Debug Information Entry(DIE)

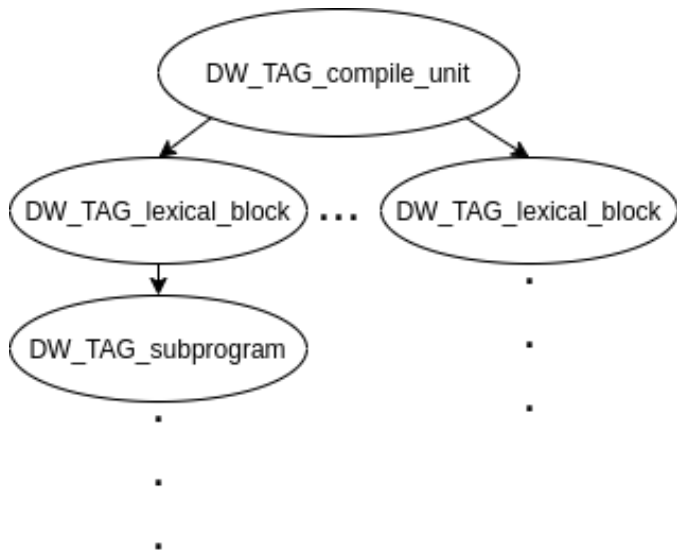

- DebugInformation Entry(DIE).
- DWARF Attributes.
- DWARF DIE example from the .debug_info section.

```
<8><241>: Abbrev Number: 9 (DW_TAG_variable)
  <242>   DW_AT_location      : 2 byte block: 7d 3c      (DW_OP_breg13 (r13): 60)
  <245>   DW_AT_name          : (indirect string, offset: 0x40466): ptr
  <249>   DW_AT_decl_file     : 1
  <24a>   DW_AT_decl_line    : 591
  <24c>   DW_AT_type          : <0x1069>
```

Compilation unit

- Computer program is devieded into compilation units.
- Each compilation unit contains a DIE tree.

Compilation unit

Evaluating a variable

- Two parts to evaluating a variable:
 - Finding the location of the variable
 - Parsing the value into the correct type

Evaluating the location of a variable

- Two parts to evaluating a variable:
- Two parts to evaluating a variable:

Evaluating the location of a variable

```
<2><4321>: Abbrev Number: 16 (DW_TAG_subprogram)
  <4322>   DW_AT_low_pc      : 0x8000fca
  <4326>   DW_AT_high_pc     : 0x2c
  <432a>   DW_AT_frame_base  : 1 byte block: 57          (DW_OP_reg7 (r7))
  <432c>   DW_AT_linkage_name: (indirect string, offset: 0x473b8): _ZN24nucleo_r
  <4330>   DW_AT_name        : (indirect string, offset: 0x64a52): my_function
  <4334>   DW_AT_decl_file   : 1
  <4335>   DW_AT_decl_line   : 194
  <4336>   DW_AT_type        : <0x6233>
<3><433a>: Abbrev Number: 17 (DW_TAG_formal_parameter)
  <433b>   DW_AT_location    : 2 byte block: 91 7e      (DW_OP_fbreg: -2)
  <433e>   DW_AT_name        : (indirect string, offset: 0x11d94): val
  <4342>   DW_AT_decl_file   : 1
  <4343>   DW_AT_decl_line   : 194
  <4344>   DW_AT_type        : <0x6233>
```

Parsing the type of a variable

```
<1><6233>: Abbrev Number: 34 (DW_TAG_base_type)
  <6234>   DW_AT_name      : (indirect string, offset: 0x2a125): i16
  <6238>   DW_AT_encoding   : 5          (signed)
  <6239>   DW_AT_byte_size  : 2
```

Virtually Unwinding Call Stack

- Lorem ipsum dolor sit amet, consectetur adipiscing elit
- Aliquam blandit faucibus nisi, sit amet dapibus enim tempus eu
- Nulla commodo, erat quis gravida posuere, elit lacus lobortis est, quis porttitor odio mauris at libero
- Nam cursus est eget velit posuere pellentesque
- Vestibulum faucibus velit a augue condimentum quis convallis nulla gravida

Debugging library rust-debug

Debugging library rust-debug

- Lorem ipsum dolor sit amet, consectetur adipiscing elit
- Aliquam blandit faucibus nisi, sit amet dapibus enim tempus eu
- Nulla commodo, erat quis gravida posuere, elit lacus lobortis est, quis porttitor odio mauris at libero
- Nam cursus est eget velit posuere pellentesque
- Vestibulum faucibus velit a augue condimentum quis convallis nulla gravida

Embedded Rust Debugger(ERD)

VSCode Extension

- Lorem ipsum dolor sit amet, consectetur adipiscing elit
- Aliquam blandit faucibus nisi, sit amet dapibus enim tempus eu
- Nulla commodo, erat quis gravida posuere, elit lacus lobortis est, quis porttitor odio mauris at libero
- Nam cursus est eget velit posuere pellentesque
- Vestibulum faucibus velit a augue condimentum quis convallis nulla gravida

Debugger settings

- Lorem ipsum dolor sit amet, consectetur adipiscing elit
- Aliquam blandit faucibus nisi, sit amet dapibus enim tempus eu
- Nulla commodo, erat quis gravida posuere, elit lacus lobortis est, quis porttitor odio mauris at libero
- Nam cursus est eget velit posuere pellentesque
- Vestibulum faucibus velit a augue condimentum quis convallis nulla gravida

Evaluating Rust enums

- Lorem ipsum dolor sit amet, consectetur adipiscing elit
- Aliquam blandit faucibus nisi, sit amet dapibus enim tempus eu
- Nulla commodo, erat quis gravida posuere, elit lacus lobortis est, quis porttitor odio mauris at libero
- Nam cursus est eget velit posuere pellentesque
- Vestibulum faucibus velit a augue condimentum quis convallis nulla gravida

Conclution

- Lorem ipsum dolor sit amet, consectetur adipiscing elit
- Aliquam blandit faucibus nisi, sit amet dapibus enim tempus eu
- Nulla commodo, erat quis gravida posuere, elit lacus lobortis est, quis porttitor odio mauris at libero
- Nam cursus est eget velit posuere pellentesque
- Vestibulum faucibus velit a augue condimentum quis convallis nulla gravida

Blocks of Highlighted Text

In this slide, some important text will be **highlighted** because it's important. Please, don't abuse it.

Block

Sample text

Alertblock

Sample text in red box

Examples

Sample text in green box. The title of the block is "Examples".

Multiple Columns

Heading

1. Statement
2. Explanation
3. Example

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Integer lectus nisl, ultricies in feugiat rutrum, porttitor sit amet augue. Aliquam ut tortor mauris. Sed volutpat ante purus, quis accumsan dolor.

Table

Treatments	Response 1	Response 2
Treatment 1	0.0003262	0.562
Treatment 2	0.0015681	0.910
Treatment 3	0.0009271	0.296

Table: Table caption

Theorem

Theorem (Mass–energy equivalence)

$$E = mc^2$$
